Subject: RE: Sprint 7 stories_Registration Client

Hi Akshaya,

Please note my comments inline – We can discuss if required.

Please incorporate the comments by EoD today, as stories will be shared with the customer today for approval.

Subsequently, please update the status of the tasks in JIRA in the requirements detailing story –

General:

1. From subsequent sprints, request if you could also specify the requirements detailing story ID as part of the story list e-mail, enabling me to log effort.
2. Can you also update the reporters to either yourself or Vivek, as applicable. This will help track back the SPOCs for the story, in case if required by developers/testers

Sr No.	JIRA Link	User Story Title
1	MOS-10465	As the MOSIP system, I should authorize login of the Supervisor to the client application
2	MOS-1177	As the MOSIP registration client, I should enable retrying capture of face photo as configured
3	MOS-1202	UI: As a registration officer, I should be able to view static data translated to secondary language
4	MOS-1204	UI: As a registration officer, I should be able to select the option to register a pre-registered individual searching & fetching pre-registration data associated to a pre-registration ID from local system or server
5	MOS-1227	As the MOSIP registration client, I should be able to sync Config details with data store servers
6	MOS-1236	UI: As a registration officer, I should be able to trigger policies sync with data store servers
7	MOS-1239	As the MOSIP registration client, I should be able to send Registration Packet IDs from client to server

8	MOS-1243	As the MOSIP registration client, I should be able to sync data from client to server
9	MOS-1263	As the MOSIP registration client, I should be able to sync user role setup information with data store servers
10	MOS-1279	As the MOSIP registration client, I should be able to sync Registration Centre Setup data with data store servers
11	MOS-1280	As the MOSIP registration client, I should be able to sync Login Credentials with data store servers
12	MOS-1312	As the MOSIP registration client, I should be able to allow modification/update of registration client data from authorized sources
13	MOS-10555	As the MOSIP Registration Client, I should perform a local duplicate check for irises and face of an individual against the mapped registration officers' biometrics
14	MOS-1330	UI: As a supervisor, I should be able to capture an officer's biometrics during onboarding to support duplicate checks and registration submission
15	MOS-67	As the MOSIP registration client, I should enable manual updates to the client application
16	MOS-68	UI: As a Registration Officer, I should be able to manually update the client application
17	MOS-70	As the MOSIP registration client, I should be able to auto update the client application from the server
18	MOS-1292	UI: As a registration officer, I should be able to select the 'Iris Exception' option for an individual
19	MOS-1302	UI: As a registration officer, I should be able to capture an individual's iris as per the quality threshold defined
20	MOS-1299	UI: As a registration officer, I should be able to update a UIN holder's data
21	MOS-1305	UI: As a registration officer, I should be able to copy registration packet data from client machine to an external device
22	MOS-1335	UI: As a registration officer, I should be able to retrieve a UIN holder's lost UIN
23	MOS-1306	As the MOSIP registration client, I should enable retrieving a UIN holder's lost UIN
24	MOS-1325	UI: As a registration officer, I should be able to attempt to retry capturing face photo as configured

Thanks & regards,
