Subject: RE: Sprint 7 stories_Registration Client

Hi Akshaya,

Please note my comments inline – We can discuss if required.

==Please incorporate the comments by EoD today, as stories will be shared with the customer today for approval==.

Subsequently, please update the status of the tasks in JIRA in the requirements detailing story –

General:

1. From subsequent sprints, request if you could also specify the requirements detailing story ID as part of the story list e-mail, enabling me to log effort.
2. Can you also update the reporters to either yourself or Vivek, as applicable. This will help track back the SPOCs for the story, in case if required by developers/testers

Sr No.	JIRA Link	User Story Title	Comments
1	MOS-10465	As the MOSIP system, I should authorize login of the Supervisor to the client application	This story may not be applicable now. Please re-de on the new user onboarding process Switched with MOS-1206.
2	MOS-1177	As the MOSIP registration client, I should enable retrying capture of face photo as configured	1. As part of Pre-requisites or Basic Flow: - Refer original "Face Capture" story to state – "The captured the face photo as per flow defined in MO subsequently the quality score of the photo captur threshold score" Done. 2. Rest OK
3	MOS-1202	UI: As a registration officer, I should be able to view static data translated to secondary language	1. Basic Flow: - How about the flow of user selecting the language 2. Acceptance Criteria: - Point 2: Why is the user unable to select the langu story refer to the Login page where user selects the language? We can discuss on this one Ok. As per previous discussions - the secondary lan by the Admin and the user cannot select it.
4	MOS-1204	UI: As a registration officer, I should be able to select the option to register a pre-registered individual by searching & fetching pre-registration data associated to a pre-registration ID from local system or server	1. Basic Flow: - Only points 1, 2a and 4 can be retained as part of Done. - Points 2a and 3a/b/c can be moved to "Business F rule driven Done. 2. Business Rules: - Point 2 – What if the system is offline? Include ru also Done.
5	MOS-1227	As the MOSIP registration client, I should be able to sync Config details with data store servers	1. Is there a status progress to be displayed? Rest OK Done.
6	MOS-1236	UI: As a registration officer, I should be able to trigger policies sync with data store servers	OK
7	MOS-1239	As the MOSIP registration client, I should be able to send Registration Packet IDs from client to server	1. Business Rules: - Updated point 2a as below to replace "increment "Incremental list of RIDs" Only the incremental list of Registration IDs (regist the last sync) should be sent. Rest OK
8	MOS-1243	As the MOSIP registration client, I should be able to sync data from client to server	1. Please update the terminologies of Machine/Dev new terminologies circulated – Refer attached mai Done.
9	MOS-1263	As the MOSIP registration client, I should be able to sync user role setup information with data store servers	1. Data Fields: - Why is master data master file referred? The list o be synced should be referred. Added the fields to be synced.
10	MOS-1279	As the MOSIP registration client, I should be able to sync Registration Centre Setup data with data store servers	1. Data Fields: - Why is master data master file referred? The spec be synced should be specified instead. Added the fields to be synced.

11	MOS-1280	As the MOSIP registration client, I should be able to sync Login Credentials with data store servers	1. Data Fields: - Why is master data master file referred? The spec Credentials to be synced should be specified instea Added the fields to be synced.
12	MOS-1312	As the MOSIP registration client, I should be able to allow modification/update of registration client only to authorized sources	Tech story, no details in the story. - Can we include the method of validation? Custom ask for it. Tech team to advise. Likely to be taken up in a late
13	MOS-10555	As the MOSIP Registration Client, I should perform a local duplicate check for irises and face of an individual against the mapped registration officers' biometrics	1. Updated Basic Flow/Business Rules to replace "R "Users", as Supervisor maybe irrelevant 2. Business Rules: - The mechanism to match and identify duplicate s it per finger/per Iris?) Added.
14	MOS-1330	UI: As a supervisor, I should be able to capture an officer's biometrics during onboarding to support login, local duplicate checks and registration submission	1. MOS-1330: We might need to remove the refere Can keep it as a question for the Customer Modified the title to state 'Registration Officer'. 2. Business Rules: - Include: System should not mandate capturing a s (Finger print/Iris), that is marked as an exception w biometrics exception Added.
15	MOS-67	As the MOSIP registration client, I should enable manual updates to the client application	1. Title: - Title states "Manual update" but "Assumptions" s be no feature to trigger a manual update of the Cli of it needs to be updated. Changed the title. 2. Business Rules: - Point 6 - Expected behavior in case of an un-succe be confirmed with the Customer.
16	MOS-68	UI: As a Registration Officer, I should be able to manually update the client application	1. Same as MOS-67 – Update title if required 2. UI story might need UI related rules to be includ Remove this story as there is no UI for client updat
17	MOS-70	As the MOSIP registration client, I should be able to auto update the client application from the server	OK
18	MOS-1292	UI: As a registration officer, I should be able to select the 'Iris Exception' option for an individual	1. Title calls out capture of Iris exception only but " capture of iris and finger print exception. One of it Updated the title.
19	MOS-1302	UI: As a registration officer, I should be able to capture an individual's iris as per the quality threshold values defined	1. Business Rules: - Include: System should not mandate capturing a s marked as an exception while capturing biometrics Done.
20	MOS-1299	UI: As a registration officer, I should be able to update a UIN holder's data	OK
21	MOS-1305	UI: As a registration officer, I should be able to copy registration packet data from client machine to an external device	1. Business Rules: - Point 2a needs confirmation from Customer – Ple Done. - Point 2b – How will the RO know which packets h can clarify with customer if there is any such requir mark it in red Done. - Point 4 – How are we intending to control this? We will likely have an Export process instead of cop Explorer. Added a note in red.

22	MOS-1335	UI: As a registration officer, I should be able to retrieve a UIN holder's lost UIN	Refer MOS-1306
23	MOS-1306	As the MOSIP registration client, I should enable retrieving a UIN holder's lost UIN	1. Business Rules: - Refer JIRA IDs of original stories for each stage for (Like it is done in MOS-1299), so that MOS-1335 do separate reference to JIRA IDs for UI stories - Include: System should not mandate capturing a s marked as an exception while capturing biometrics Done.
24	MOS-1325	UI: As a registration officer, I should be able to attempt to retry capturing face photo as configured	1. UI story might need UI related rules to be includ UI details included in MOS-1177.

Thanks & regards,

Subject: Sprint 7 stories

Hi Resham

Pls find below the final list.

MOS-10465
MOS-1177
MOS-1202
MOS-1204
MOS-1227
MOS-1236
MOS-1239
MOS-1243

MOS-1263
MOS-1279
MOS-1280
MOS-1312
MOS-10555
MOS-1330
MOS-67
MOS-68
MOS-70
MOS-1292
MOS-1302
MOS-1299
MOS-1305
MOS-1335
MOS-1306
MOS-1325

Thanks and Regards,
Akshaya R
Phone: +91 9916662832

HI Resham

Please add to the list too. Sorry for the inconvenience caused.

1177
1202
1204
1220
1325

And please don't review 1365. It's a dropped requirement.

Please find the final revised list below for your easy reference.

MOS-1227	MOS-1329
MOS-1236	MOS-1330
MOS-1239	MOS-1335
MOS-1243	MOS-67
MOS-1263	MOS-68
MOS-1279	MOS-10465
MOS-1280	MOS-1177
MOS-1292	MOS-1202
MOS-1299	MOS-1204
MOS-1302	MOS-1220
MOS-1305	MOS-1325

MOS-1306	
MOS-1312
